

Mr. Bowman holds the position of Vice President – Voice Services, Technology and Innovation at Orange. He is responsible for bringing new services to market as rapidly as possible by identifying customer applications that improve the customer's lifestyle experience 'for them' or 'for their business'.

Mr. Bowman's senior level experience in designing, developing and launching new telecommunications products and services has led to his unique approach and methodology in product development and delivery.

Within the France Telecom group, he is responsible for Specific Fixed Mobile Convergence applications for the mass market.

He is a seasoned telecom executive with a proven track record of delivering innovative, customer focused applications. He previously held assignments at several regional Bell Operating companies, including assignments at AT&T, Bell Telephone Laboratories, Bellcore and US West. Since 1993, he has led a number of New Product Development organisations with many revenue generation successes attributable to innovation.

Most recently, Mr. Bowman was President of CDT Telecommunications, Inc., a telecommunications outsource provider in the United States (\$135 million annual turnover).

As an advocate of customer based applications, he holds 3 patents for innovation directly related to unique customer interfaces for telecommunications services.

He is based in London and Paris.
