

John M.A. Roy is Senior Research Analyst/Nanotechnology and Technology Strategist at WR Hambrecht + Co, an investment bank providing underwriting and financial advisory services to emerging growth companies, as well as equity research, sales and trading services to institutions and full-service brokerage for individuals. WR Hambrecht + Co's pioneering use of auctions for initial public offerings (OpenIPO®) and other equity and debt offerings has dramatically changed the financial services landscape for both investors and issuers. Dr. Roy joined WRH+Co from Merrill Lynch where he focused on Nanotechnology and technology strategy. Dr. Roy has also worked at JPMorgan and Neuron Data. Dr. Roy has a Ph.D. in Computer Science from the University of California and a MSEE from the University of Southern California.
