Delivery Method	Live Instructor-Led (Group Live)
Course Description	The Deloitte Future Forward Forum is a live in-person CPE event in Sioux Falls where subject matter specialists will lead updates on many of the latest emerging issues and technical accounting topics, including business and regulatory ethics, Artificial Intelligence transformation and use-cases for businesses and finance, tax policy update, SEC and FASB updates, and cyber and enterprise risk management. Participants will have the opportunity to enhance their knowledge and earn up to 6 CPE credits for this session.
Learning Objectives	1. Summarize selected emerging technical accounting and regulatory developments and their potential implications for financial reporting and business decisions. 2. Apply an ethical decision-making framework to business and regulatory ethics scenarios. 3. Identify practical artificial intelligence use cases in business and finance, including opportunities to improve productivity, analysis, and decision support. 4. Evaluate key AI-related risks and governance considerations, including data quality, transparency, human oversight, cybersecurity, and responsible use. 5. Describe selected tax policy developments and assess their potential effects on business planning, transactions, and compliance activities. 6. Recognize significant cyber threats and enterprise risk exposures that may affect business operations, financial processes, and organizational resilience. 7. Explain how risk governance, internal controls, monitoring, and response planning support effective cyber and enterprise risk management."
