

Greetings!

The Deloitte team will be using the videoconferencing platform Zoom to deliver a more interactive virtual presentation. To help provide the best experience, we're offering a few tips in advance. We'll also give additional guidance during the call.

TIP #1

Download Zoom prior to our webinar.

You can download Zoom at <https://zoom.us/download> any time before our webinar. It doesn't take long, but we recommend downloading at least an hour before the call. If CPE is offered, log-in using the name that should appear on the CPE certificate.

TIP #2

Use Zoom tools and features to actively engage.

Ask questions at any time using the Q&A feature. If live Q&A is part of the webinar, the Raise Hand feature will be available. Raise your digital hand to let Panelists know you'd like to ask a question live.

TIP #3

Technical Issues

If you're experiencing technical issues please log out and log back on. If you get a "internet connection is unstable" message, free up bandwidth by removing non-essential devices from your wireless network.

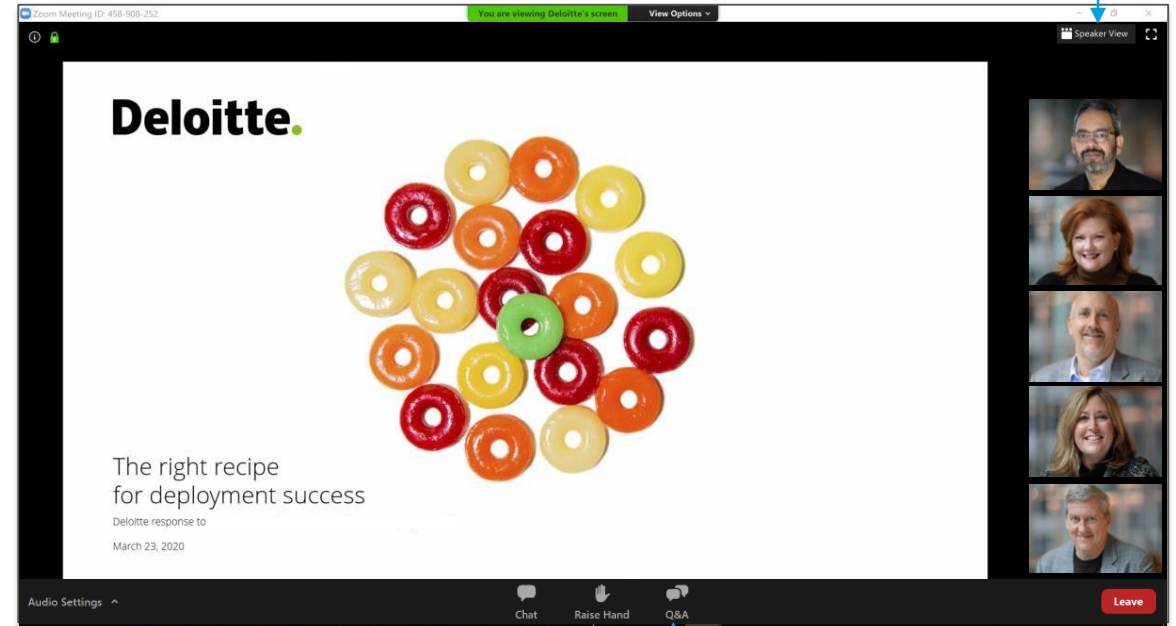

TIP #4

Familiarize yourself with the Zoom call controls

Video layout

Toggle between Gallery View and Speaker View to see all participants or just the speaker
